WORKS SEVEN MONTHS A YEAR

Near Earth Asteroids

Potentially Hazardous Asteroids ([PHAs](#)) are space rocks larger than approximately 100m that can come closer to Earth than 0.05 AU. None of the known PHAs is on a collision course with our planet, although astronomers are finding [new ones](#) all the time.

On July 30, 2015 there were **1601** potentially hazardous asteroids.

Recent & Upcoming Earth-asteroid encounters:

Asteroid	Date(UT)	Miss Distance	Size
2015 QQ21	Jul 24	1.5 LD	12 m
1999 JD6	Jul 25	18.8 LD	1.6 km
2005 NZ6	Aug 6	76.5 LD	1.4 km
2005 JF21	Aug 16	20.1 LD	1.6 km
2004 BO41	Aug 31	57.3 LD	1.2 km
1991 CS	Sep 4	62.1 LD	1.4 km
2014 KS76	Sep 14	8.7 LD	22 m
2004 TR12	Sep 15	58.8 LD	1.0 km

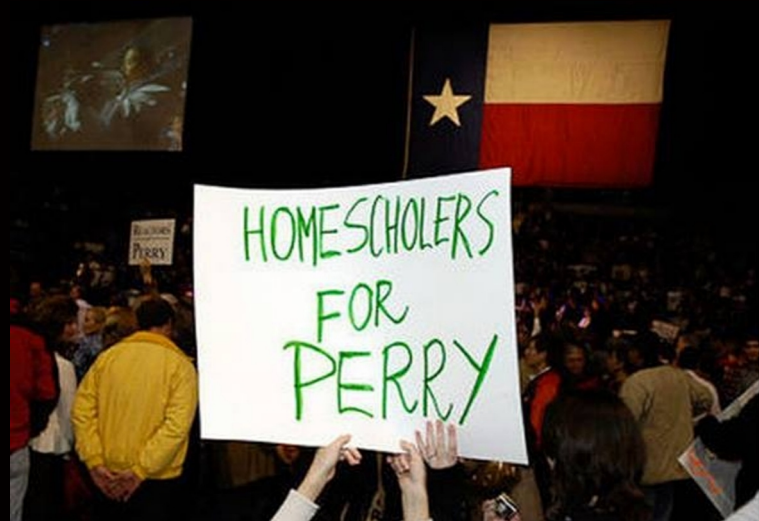

Notes: LD means "Lunar Distance." 1 LD = 384,401 km, the distance between Earth and the Moon. 1 LD also equals 0.00256 AU. MAG is the visual magnitude of the asteroid on the date of closest approach.

The Ultimate Cheatsheet for Critical Thinking

Want to exercise critical thinking skills? Ask these questions whenever you discover or discuss new information. These are broad and versatile questions that have limitless applications!

Who

... benefits from this?
... is this harmful to?
... makes decisions about this?
... is most directly affected?

... have you also heard discuss this?
... would be the best person to consult?
... will be the key people in this?
... deserves recognition for this?

What

... are the strengths/weaknesses?
... is another perspective?
... is another alternative?
... would be a counter-argument?

... is the best/worst case scenario?
... is most/least important?
... can we do to make a positive change?
... is getting in the way of our action?

Where

... would we see this in the real world?
... are there similar concepts/situations?
... is there the most need for this?
... in the world would this be a problem?

... can we get more information?
... do we go for help with this?
... will this idea take us?
... are the areas for improvement?

When

... is this acceptable/unacceptable?
... would this benefit our society?
... would this cause a problem?
... is the best time to take action?

... will we know we've succeeded?
... has this played a part in our history?
... can we expect this to change?
... should we ask for help with this?

Why

... is this a problem/challenge?
... is it relevant to me/others?
... is this the best/worst scenario?
... are people influenced by this?

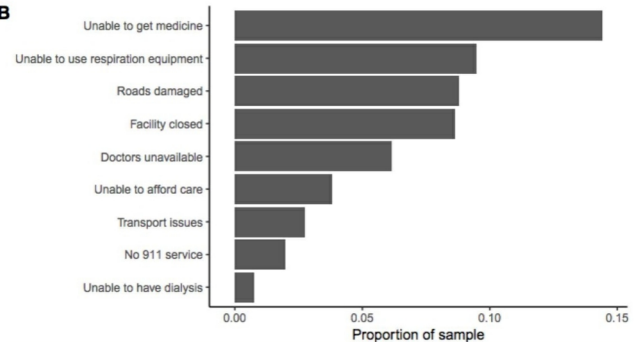

... should people know about this?
... has it been this way for so long?
... have we allowed this to happen?
... is there a need for this today?

How

... is this similar to _____?
... does this disrupt things?
... do we know the truth about this?
... will we approach this safely?

... does this benefit us/others?
... does this harm us/others?
... do we see this in the future?
... can we change this for our good?

B

HARVARD TH CHAN SCHOOL OF PUBLIC HEALTH

This graph, published with the study, shows the percentage of surveyed households that reported at least one day of disrupted medical services, by cause.

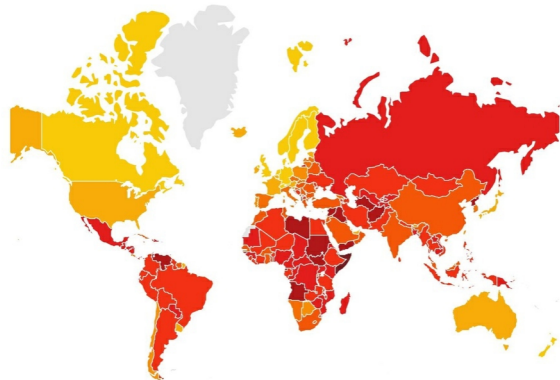

Emergency mismanagement can have devastating inadvertent impact if we do not properly review and learn after each event. We see that the preponderance of these deaths may come from the inability of people to get the medicine they need to stay alive and the respiration equipment if their pulmonary functions are challenged. If there is inadequate fo

Critical flaw lets hackers control lifesaving devices implanted inside patients

Implanted devices from Medtronic can have their firmware rewritten, DHS warns.

by Dan Goodin - Mar 21, 2019 4:25 pm EDT

The federal government on Thursday warned of a serious flaw in Medtronic cardio defibrillators that allows attackers to use radio communications to surreptitiously take full control of the lifesaving devices after they are implanted in a patient.

Defibrillators are small, surgically implanted devices that deliver electrical shocks to treat potentially fatal irregular heart rhythms. In recent decades, doctors have increasingly used radios to monitor and adjust the devices once they're implanted rather than using older, costlier, and more invasive means. An array of implanted cardio defibrillators made by Medtronic rely on two types of radio-based consoles for initial setup, periodic maintenance, and regular monitoring. Doctors use the company's **CareLink Programmer** in clinics, while patients use the **MyCareLink Monitor** in homes to regularly ensure the defibrillators are working properly.

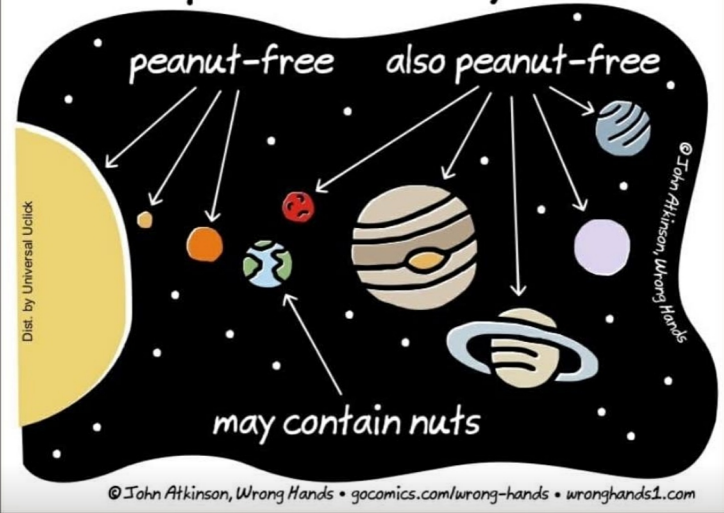

No encryption, no authentication, and a raft of other flaws

Trump and the Pandemic

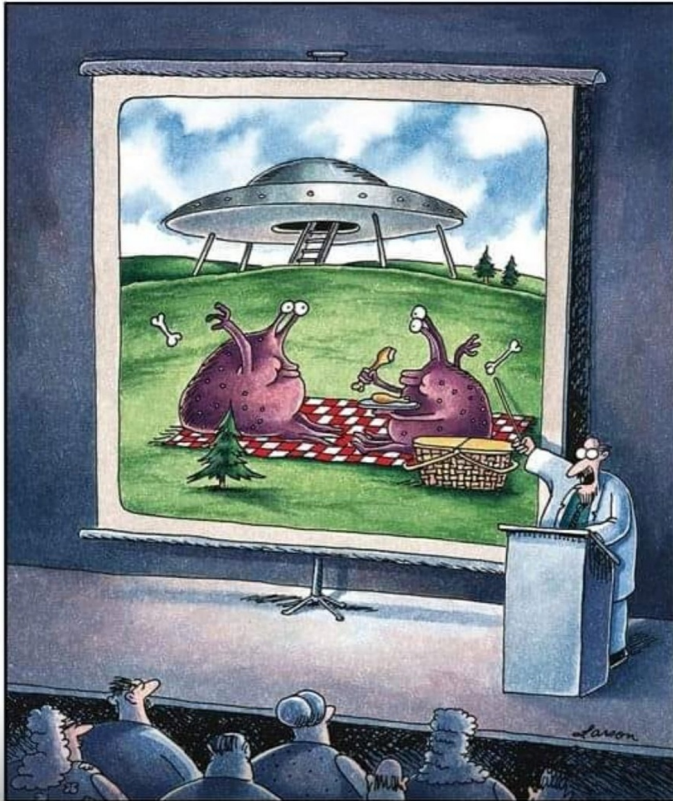

Trump's position on the World Health Organization is foolish and unwise. He does not understand the nature of the pandemic threat. We are going to have another one. He doesn't seem to understand that or to properly prepare for it. To blame the WHO for his sleepy response to the mortal threat is going to fool no one. Moreover, the advice he g
